## Natural Trunk Trees

# Hawaiian Ficus Range & Ficus Mini Leaf

A luxury product with an extremely high leaf count and twisted spiral liana stems, excellent for dense screening or as attractive standalones. In several sizes in green and variegated leaf forms.

1 TL090 6ft/180cm variegated - liana stem

2 TL027 6ft/180cm green - liana stem

TL006 4ft/120cm green - twisted liana stem

TL007 4ft/120cm variegated - twisted liana stem

TL008 3ft/90cm green

TL009 3ft/90cm variegated

## Natural Trunk Trees

## Ficus Exotica Natural

Ficus Exotica products are based on natural Ficus, good for low level dense coverage or screening. The leaves have great detail with new green shoots and small leaf growth adding to their realism. The ficus exotica natural is based on natural Ficus with bamboo cane. The single ball and double ball twisted stem make stunning standalones.

1 TL091 4ft/120cm Natural Green

2 TL091/V 4ft/120cm Natural Variegated

## Natural Trunk Trees

### Ficus Natasja

Lush foliage with a mix of glossy dark mature and light new leaves similar to citrus, with fine close-up detail. Tall and slim, they are ideal for places that need planting with height but not bulk.

1 TL004 5ft/150cm Topping Tree

2 TL101 6ft/180cm Tropical

TL024 5ft/150cm Tropical

3 TL004/6 6ft/180cm Topping Tree

## Natural Trunk Trees

## Japanese Maple Range

An ever - popular series of trees with their unique palmate foliage. In green, green/red or burgundy with a choice of stems.

Specimen trees are available with inherently fire retardant foliage from 2ft (60cm) to 24ft (8m).

1	Burgundy	TL178 6ft/180cm
		TL176 5ft/150cm
		TL171 4ft/120cm
2	Green	TL177 6ft/180cm
		TL175 5ft/150cm
		TL170 4ft/120cm
3	TLBON5 5ft/150cm on bonsai stem

## Natural Trunk Trees

# Capensia

Dark bronze-green leaves with a contrasting burgundy underside distinguish this product. Capensia Crazy is built with three leaf clusters on distinctive twisted stems.

Specimen Capensia is available in IFR Foliage from 2ft (60cm) to 24ft (8m) - in various styles and shapes.

1	TL054/5 5ft/150cm
	TL154 4ft/120cm Crazy
2	TL089 6ft/180cm
	TL151 5ft/150cm
	TL150 4ft/120cm

Natural Trunk Trees

Split Philo, Pothos & Shefflera

The Split Philo (Cheese Plant) and Pothos have wide and dense leaf coverage.

1	TLCH5 5ft/150cm Split Philo/Cheese Plant
2	TL400/5 5ft/150cm Pothos on Moss Pole
	TL400 4ft/120cm Pothos on Moss Pole
3	TLSHEF6 6ft/180cm Shefflera
	TLSHEF4 4ft/120cm Shefflera

## Natural Trunk Trees

# Dracaena Reflexa

Abundant leaves with strong, light-catching shapes characterise these typically tropical trees, with good silhouettes and surfaces for lighting. Available in a range of sizes. Dracaena Reflexa comes in "Song of India" and "Song of Jamaica" varieties, and the former almost seems to radiate light. Both are available with inherently fire retardant foliage.

1 TLD Rac5 5ft/150cm - 'Song of India'

2 TLD Rac/5G 5ft/150cm - 'Song of Jamaica'

## PEACE OF MIND

Firesilx™ is an exclusive range of Inherently Fire Retardant products. These products have been tested by numerous fire departments worldwide and our own BS Certificates (BS5852) are available on request. With Firesilx™ foliage you get consistent cover - even on PVC parts, this is because it is part of the manufacturing process. The protection is not sprayed or dipped into fire retardant chemicals and as a result will not leave an oily film which attracts dust or washes off. There is also no reproofing required. With large scale commercial projects, it is factors like these that make all the difference - and give you peace of mind.

**FIRESILX**™

**REPORT OF EXAMINATION****SUBJECT:** Three Pieces of Foliage

**DESCRIBED AS:**

- 1) Variegated green leaves
- 2) Dark Green/Red leaves
- 3) Dark Green/Light Green leaves

**TEST REQUESTED:** Resistance to ignition by smouldering ignition source (cigarette) and small gas flame (match equivalent).

**RESULTS**

**Ignition Sources** 0 (cigarette) and 1 (gas) as defined in BS.5852:1990 were applied directly to the leaves.

The following tests relate only to the ignitability of the combustion of materials under the particular conditions of test; they are not intended as a means of assessing the full potential fire hazard of the materials in use.

<u>Ignition Source</u>	<u>Observations</u>										
<b>Variegated leaves</b>											
0 (cigarette)	No flames, smoke or smouldering were observed										
1 (gas)	<table> <tr> <th colspan="2"><u>Time to Extinction, secs</u></th></tr> <tr> <th><u>Flames</u></th><th><u>Smoke</u></th></tr> <tr> <td>i) Nil</td><td>5</td></tr> <tr> <td>ii) Nil</td><td>10</td></tr> <tr> <td colspan="2">No smouldering</td></tr> </table>	<u>Time to Extinction, secs</u>		<u>Flames</u>	<u>Smoke</u>	i) Nil	5	ii) Nil	10	No smouldering	
<u>Time to Extinction, secs</u>											
<u>Flames</u>	<u>Smoke</u>

ALC.T : 40641 : 0701

**Conclusion**

From the tests carried out the three samples of foliage submitted comply with the flammability requirements of the tests of BS 5852, since none of the samples showed excessive burning and no smouldering.

**Comment**

BS 5438 test is designed for testing the ignition of fabric samples and cannot be applied to the actual samples of foliage of the type we received because of the size of the test pieces involved.

The results of the examination refer only to the samples submitted and do not guarantee the bulk of the items from which the samples were obtained to be of equal quality.
